

# What Do You Eat?

You are particular about what you eat being clean and wholesome. You wouldn't buy from a firm that didn't keep things in good condition if you knew it :

How about your canned vegetables, fruits, etc? Do you buy culls or do you get the choice grades? , , :

The price of canned goods depends on two things:

**FIRST:** The quantity that is placed in the can.  
**SECOND:** The quality of the product used.

In every line there are several grades. The very finest and most properly ripened go into the Fancy Grade, then the next selection is First Grade, Second Grade and on down.

The fellow who gets the last grade doesn't get much, to be sure : : : : :

There are many grades of good canned goods on the market but there are none better than pickwick. Nothing less than First grade goes into PICKWICK PRODUCTS : :

You can feel safe when eating Pickwick that you are not eating culls—that you are getting the best, most properly ripened and most perfect articles possible to secure : : :
